HOME CINEMA INTERIORS

BESPOKE HOME RENOVATIONS

Home Cinema Interiors are proud to offer a truly bespoke range of Bespoke Home Renovations.

We offer a team of specialist trades with years of experience in Audio Visual installations, smart home technology, carpentry, electrics and painting and decorating.

Client feedback has informed us of the benefits experienced from having their home renovations project managed and carried out by one company.

MEDIA WALL

A Media Wall is a specially built wall in your home that can house (and hide, if necessary) your audio, video, gaming and any other media equipment, whilst being aesthetically pleasing and looking as though it’s always been part of the room.

They can be minimalistic and subtle, or bold stand-out feature walls. All of our Media Walls are Bespoke and designed to align with our client's vision, they are quite often categorised into Chimney Breast Media Walls or Shelving and Storage Media Walls.

CHIMNEY BREAST

SHELVING & STORAGE

BEDROOM

Wood panelling, lighting, storage solutions, skirting, coving or painting and decorating.

We offer all the services you may need to ensure a beautiful bespoke bedroom renovation.

Lounge / Living Area

As well as living areas being a popular location for Media Wall installations, we are able to renovate the whole room in numerous ways to achieve any desired look and feel.

CEILING

The ceiling is definitely not the first area most think about when pondering home renovations. We certainly do not give it as much thought as its counterpart - the floor.

It is however a significant part of any room and almost always is where the light source is. Lighting is undoubtably pivotal in any interior renovation.

HOME
CINEMA
DESIGN

A dropped perimeter ceiling can not only add interest and dimension but with smart lighting give you control to change the feel of the room at the touch of a button (or a voice command!)

CINEMA ROOM

CINEMA ROOM

The ultimate room for sound and vision. This is where Audio Visual technologies can really come to life and of course, a favourite for Home Cinema Interiors.

OFFICE

From bespoke desks, wood panelling, smart lighting, screen mounting and other interior options. An office space is the perfect space to mix technology with interior design and Home Cinema Interiors thrive on that combination!

KITCHEN

Although kitchens may seem a very different installation to cinemas, our specialisms and skills within carpentry, lighting and smart home technology mean that this is an ever-increasing service for us.

Home Cinema Interiors' dedicated team provide thorough communication before and during all home renovations.

We are also always happy to provide no obligation quotes for any renovation a client has in mind.
